DANA.**

BOOK OF DOORS

2024/25

BEFORE

stands a decision.

BEHIND

there's a lot going on.

BECAUSE

there is only one door:

DANA.

A DANA door is more than meets the eye at first glance.

BEFORE every door stands your early planning decisions to make the most of the space available.

BEHIND every door is our constant thought process to develop doors that make everyday life better without compromise.

BECAUSE we reinvent doors day after day - and beyond. That is how we make innovative doors, making premium quality our standard while never losing sight of what defines us at DANA: doors with character.

And this is the world of doors from DANA that you can experience in a unique way in this special Book of Doors.

ANYTHING BUT CONVENTIONAL.

The fascinating world of DANA.

Now we could tell you that we're part of the international JELD-WEN group and make the most popular doors on the Austrian market. But what's far more important is what that means to you.

50 years' experience and our principle of always imagining the next step for doors produce unique and unexpected results. In the world of DANA, the extraordinary is standard and simply anything is possible - even meeting small, extremely likeable monsters!

Our DANAs not only resemble doors, they also stand for what DANA is all about: special ideas, enthusiasm and down-to-earth solutions. Let us whisk you away to a completely new world of doors: a world located in Spital am Pyhrn in Upper Austria that surprises you every day and has everything from product development to production to sales.

There's more about the DANAs at DANA.at

OPEN. TO. Doors that fulfil all expectations.

Discover the expertise in doors that has its roots in the Pyhrn-Priel region and Gurktal in Carinthia, and get a first impression of the world of DANA.

And so, without further ado:

LIGHTS OUT, START THE FILM!

EVERY HOME A UNIQUE DOOR.

**They open up new worlds, connect spaces and create security
on many levels: our doors.**

BEFORE stands a decision.

Because no two ways of living, no two homes are alike. On the contrary, we all have different requirements for our own four walls - especially for our doors. Some people focus on door concepts in flush-fitting styles or novel designs with eye-catching surfaces. For others, innovative door functions such as security features and soundproofing are an absolute must. But whatever your preferences, one thing is crucial: the sooner you include your doors in the planning phase, the more options you will have when designing your home.

BEHIND there's a lot going on.

Children tear from one room to another as they play, while the grown-ups drag themselves in at the door, worn out after a long day at work. So whereas innovations like DANAmotion for soft closing are ideal for some rooms, door models with additional features such as fire protection or burglary resistance are perfect for meeting your safety requirements. Our aim is always the same: to create doors that are right for every customer, every room and every type of circumstances.

BECAUSE only one door does it all: **DANA**.

In our book of doors we invite you to discover the diversity of our world of doors, explain our innovative solutions and show you how our door designs make your daily life easier.

BECAUSE they give you

- Smooth and easy opening – thanks to practical knobs and push handles
- Matching door designs in narrow corridors – with Reverso
- More safety and comfort – with DANAmotion
- Save space on both sides when opening doors – with Swing
- Peace, quiet and increased sound insulation with SILENT+ (more details on p. 38)
- Improved dimensional stability thanks to the reinforced door frame – PROTECT+ (more details on p. 39)

OPEN. TO. A
pivotal door experience.

DANA.AT/INSPIRATION

”

Aren't doors fascinating?

We can only guess what is hidden behind them, until we open them. They divide and yet they join. They protect and they hide. They open up new worlds where anything appears possible.

It is this fascination with the subject of doors that inspires us at DANA over and over again to create something special. We want to surprise you every day with our functions, designs and ideas. So that you see doors for what they are: something unique.

SOMETIMES NUMBERS SPEAK LOUDER THAN WORDS.

DANA – more than a door.

Struktura knotted oak White oiled

More than just a material:
veneer is a wonderful “active
ingredient” that allows wood
to be seen in a new light –
again and again.

THE BEST OF WOOD.

Natural surfaces.

The history of wood veneer goes back thousands of years: the ancient Egyptians were already enhancing their furniture with it. Hardly surprising, since veneers are undoubtedly the most elegant things that wood can offer.

It's as if the essence of a tree has been pressed into fine sheets.

The best of the tree is worked into thin sheets that enhance the appearance of your DANA door like a second skin. They are warm, vibrant, multifaceted and at the same time particularly economical. Unique items of the kind that only nature can produce. We love to play with the structures of veneer and to constantly highlight its beauty in new ways. It is in veneer that the whole breadth of the quality of our craftsmanship is revealed.

An outstanding product deserves outstanding appreciation.

As a member of the Initiative Edelfurnier we aim to move others to share our enthusiasm and place the importance on this wonderful material that it deserves.

Find out more at edelfurnier.at and discover the wonderful world of our veneer doors from page 52.

BEHIND lies the world of natural materials.

PLAN EARLY. LIVING IDEAS.

7 steps to a new door experience.

Start thinking about doors early in the planning stage.

When planning your home, there are many questions that need asking right at the start so that every idea can be realised. The sooner you can answer them, the better! That's the golden rule for all house-builders!

- Do you want your door to be an **eye-catcher** or to discreetly match the decor?
- Where is the hinge**, how big is the swing angle?
- Do you already have **clear ideas** for the rooms' height and the door formats? (e.g. ceiling height, double leaf etc.)

Know your style.

Ask yourself what style you want to characterise your home. That doesn't mean you can never stray from it, on the contrary. But a basic direction should be clear. More from page 48.

What style will you still want to be living with in ten years' time?

Take a look round where you're living now: **What do you like, what do you not like so much?**

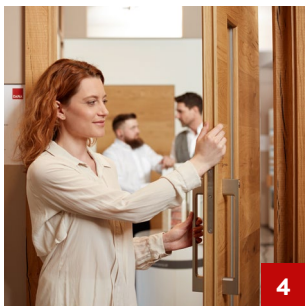

Decide on a **basic direction** e.g. timeless.

Let the effect of our doors sink in.

Most furnishing decisions are made instinctively, on the spur of the moment. That's why you should study our doors and see how they make you feel – ideally in our showrooms. More on page 134 and at dana.at/schauraum

- Need **comprehensive advice**? No problem! Arrange an **appointment** with our sales team today – **you can do it online!**
- Need time & quiet**? No problem either – with a VIP card you can visit our showrooms whenever you wish.

The right door for every room.

Whereas safety and calm are priorities in some rooms, in others we want solutions that work very simply or save space.

- Who is going to use the door and how should it open? (e.g. swing, slide)
- Would you like **particular functions**? (e.g. SILENT+ for significantly increased sound insulation or PROTECT+ for better humidity protection)

Give your door the most attractive frame.

Like a picture frame, the door frame contributes to the overall impression your DANA door makes. That's why we have a frame to suit every model – from page 126.

- Should the **frame determine the door design**?
- Should the door, wall and casing be flush or on different levels?

Arrange
appointment
online
dana.at/schauraum

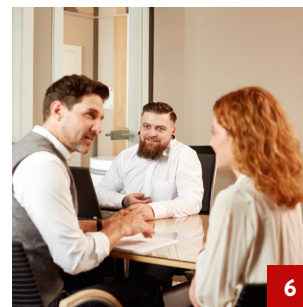

YOUR PRACTICAL DOOR CHECK-LIST

available at dana.at/tuerencheckliste

Prepare yourself for a surprise!

This is probably the most enjoyable part: because at DANA you experience innovations that no other door offers. More from page 19.

- Discover **DANAmotion** for soft opening and closing, the space-saving wonder **SWING**, our clever **smartClose Pro System** and much more!

Fall in love with the details.

You have the door handle or knob in your hand several times a day. So it not only needs to look good, but to feel great and suit the door! More from page 113.

- Do you prefer **simple handles, recessed handles or push handles**?
- Would you like **custom-made designs**? (e.g. flush, same design as the door etc.)

BEFORE,
BEHIND,

MODUS 4 Matt white

DANA

42
mm

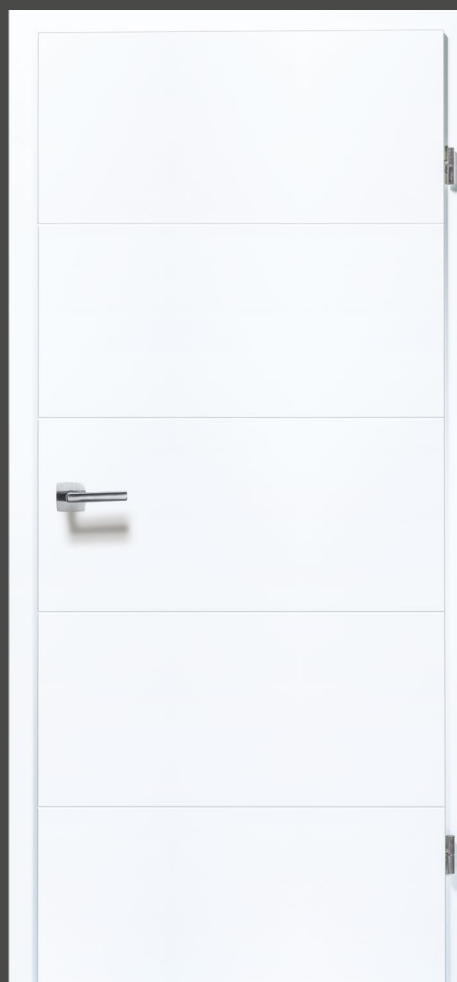

TÜRENSTÄRKE PLUS

Even longer-life and sturdier doors – as standard!

Our Türenstärke Plus makes premium quality standard: The door leaf of every DANA door is 42 mm thick - that's nearly 10% thicker than usual in the trade. What's more, a four-sided solid wood frame increases the value and strength of your doors still further – at no extra charge!

- Even greater **stability** thanks to the high-quality, four-sided solid spruce frame
- Even **more durable** doors: even more inherent stability
- Even more closing comfort: the door closes **flush and evenly**
- 42 mm door leaf thickness as premium standard

dana.at/tuerenstaerke-plus

STOPS

at the preset angle.

APART country oak

TÜRENSTÄRKE+ | DANAMOTION

DANAMOTION

No slammed doors, no danger.

Sometimes powerful innovations are also very gentle: With DANAmotion, slammed doors, danger from doors bursting open uncontrollably and doorstops are things of the past:

- Automatic, smooth **stopping when opening**
- **Automatic soft closing**
- Stops at a preset opening angle (variable from 90° to 105°)
- The door also stays completely closed without a lock – for a particularly elegant look

dana.at/danamotion

Float all-glass door

ALL-GLASS
SOFT-SHUT DOOR.

DANAMOTION EASY

More safety for all-glass doors.

DANA presents DANAmotion Easy, the impressive innovation for especially elegant all-glass doors: no more slammed or swinging doors; the dangers of doors flying open uncontrollably are now a thing of the past.

- **No slamming** of all-glass doors
- No uncontrolled flying open of doors
- **No doorstep** needed
- Automatic, slightly **cushioned stopping** when opening
- Automatic, slightly cushioned closing
- Stops at a preset opening angle (variable from 90° to 110°)
- Can be combined with GT-Kontext Standard and every other door in the Kontext range (see p. 29)
- Also available in matt black

dana.at/danamotion-easy

SMARTCLOSE PRO

keeps the door shut –
without a conventional lock.

MODUS 4

DANAMOTION EASY | SMARTCLOSE

SMARTCLOSE PRO

The smart way to close a door.

DANA smartClose Pro **cushions the door** when it is closed and keeps it shut. This automatic shutting mechanism means **locks and conventional handles are no longer needed**. So you have even more scope with your designs and can, for example, choose push or recessed handles.

- Stays shut even without a latch – for example with a push or recessed handle
- Gentle closing like that of kitchen drawers
- Extremely unobtrusive: the system is almost invisible once installed
- More design flexibility when choosing a handle because no lock is necessary
- On all-glass doors the holding mechanism is concealed behind an elegant covering strip

dana.at/smartclosepro

**SOFT
DOOR CLOSING
IS A DREAM.**

That comes true with
smartClose pro.

P-MOTION

now also available
as an all-glass door.

P-MOTION

Swings and stops gently in both directions.

The new swing door corner hinge for solid doors (VB) and all-glass doors (GT) features impressive convenience and design. The integrated hydraulic damping gently brakes the door when closing to prevent the oscillation that occurs on a conventional swing door.

- Door can remain open at an angle of 90° in either direction
- **Adjustable hydraulic damping** gently brakes the door in both directions when closing
- **No oscillation**
- Swing doors that are far more convenient than before
- Hinges for P-Motion solid doors: when the door is closed, the hinges are almost invisible and are discreetly in the background when the door is open
- Hinges for P-Motion all-glass doors: Available in modern stainless steel and matt black finishes
- Mountings are also compatible with underfloor heating
- Also available in matt black

dana.at/pmotion

SWINGS TO THE SIDE
when opened.

STRUKTURA
Cracked oak brown

P-MOTION | SWING

SWING

Even more space to live in.

SWING doesn't just open, it swings to one side on the concealed rail. The door leaf reaches into both rooms. A real experience – and a real **space saver!**

- Especially space-saving: the door leaf can open into both rooms like a swing door
- More planning freedom thanks to the new door opening system
- Ideal wherever a **sliding door** is not feasible
- Cushioned closing
- **Can stand open in various positions**

dana.at/swing

CRACKED OAK black

A SURPRISING
way of opening.

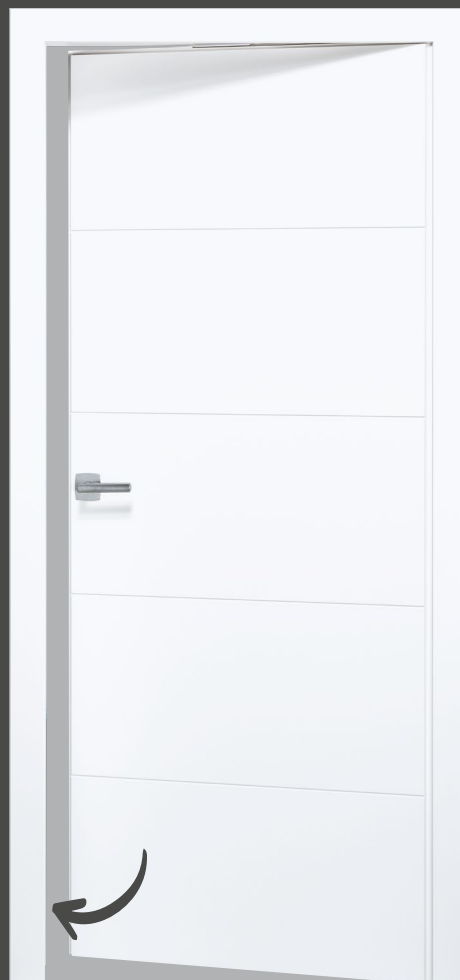

REVERSO

Ideal for narrow reception areas.

Flush-fitting doors are ideally suited to a puristic interior design. Usually they open “inwards”, into the room – but this isn’t always appropriate, e.g. in narrow hallways. With REVERSO, you can now express your style everywhere: **opening into the passage, which takes up so much space, is avoided**; the room has a more harmonious feel.

- Elegant appearance: door leaf and casing are flush – as with conventional flush-mounted doors that open forwards
- Striking design and space-saving - the door leaf is not in the way
- The door surprisingly opens into the next room
- Depending on the model it can be fitted with the DANAmotion system for cushioned opening and closing
- Also available as an all-glass door

dana.at/reverso

Door and wall in one colour

KONTEXT 46

Simple, no frills – yet so eye-catching.

KONTEXT 46 really melts into the wall: **no casing, no hinges** are visible. This is not just modern and aesthetically pleasing – it also makes cleaning easier since no dust can gather on the casing.

- If desired, completely flush-fitting and with recessed handle
- Can be painted or papered to match the design of the wall – but is also available in every door design
- Opens either inwards or outwards with the same appearance
- Optional DANAmotion Easy: softens opening & closing
- Also available as a ceiling-height version, as an all-glass door with glass cutout featuring selected types of glass, or as Charisma moulded glass door (from p. 80)
- Same look for interior doors (KONTEXT 46) and entrance doors (KONTEXT 66) with burglary resistance, fire protection or sound insulation in the corresponding climate class or as a DANA SMART DOOR
- Kontext frame available with anodised aluminium surfaces, in white and now also in matt black

dana.at/kontext46

BECAUSE
there are so
many different
possibilities
see page 92

STRUKTURA
Cracked oak brown

INTERIOR 46

The new freedom in door design.

Those who prefer flush, clear forms will love this DANA innovation: the casing is replaced with a panel frame that can be fitted **flexibly** either in front or in the middle of the wall aperture. That means you can decide on the building site which version you prefer. If the frame is placed in the middle, a new, reduced stylistic idiom is created.

- **Smoothness** in a new form
- Even more flexibility: You decide where the frame should be fitted
- With the DANA magnetic lock for soft and quiet closing
- The door and frame form a flush surface on both sides
- With concealed hinges
- with a subframe if desired (p. 129)
- Also available as an all-glass door or ceiling-height version
- with DANA Motion Easy as an option for soft opening and closing

dana.at/interior46

STRUKTURA knotted oak white oiled

CEILING-HEIGHT DOORS

The epitome of modern living.

Ceiling-height door elements give rooms that certain something. That is why they are available from DANA for the entire range of doors. For special, eye-catching appearance, highlighted with features such as a fanlight, glass skylight or top panel.

- **Available for all door types and surfaces** - matching your style and design requirements
- **Design freedom:** flush with the surface, at one with the wall or with glass cut-outs
- Ceiling-height or extra-high doors create a **feeling of space** - even in small rooms
- Should ideally be **designed during the planning phase of the house**
- **Improved dimensional stability** thanks to the 4-sided standard solid wood frame made by DANA

dana.at/raumhohe-tueren

GT Float - flush-mounted

NIVELO

Flush-mounting, done with glass

Flush doors have become an essential part of modern interior design – and at DANA they are now also available in an all-glass version! **Door, casing and hinges merge** into a single unit making rooms look bigger, brighter, more inviting. That is the future of glass doors, available today at DANA.

- Brings the trend of a reduced stylistic idiom to the all-glass door
- Door leaf, hinge and casing are all flush
- A design highlight for expansive, bright living space
- **Soft and quiet closing** with an elegant closing system: a discreet magnetic strip, invisible when the door is closed, keeps the door shut
- With all the advantages of our all-glass doors – more details from p. 102
- Nivelo hinge - also available in matt black

dana.at/nivelo

DISAPPEARS
completely
into the wall.

GT-Graphit

NIVELO | INSIDE

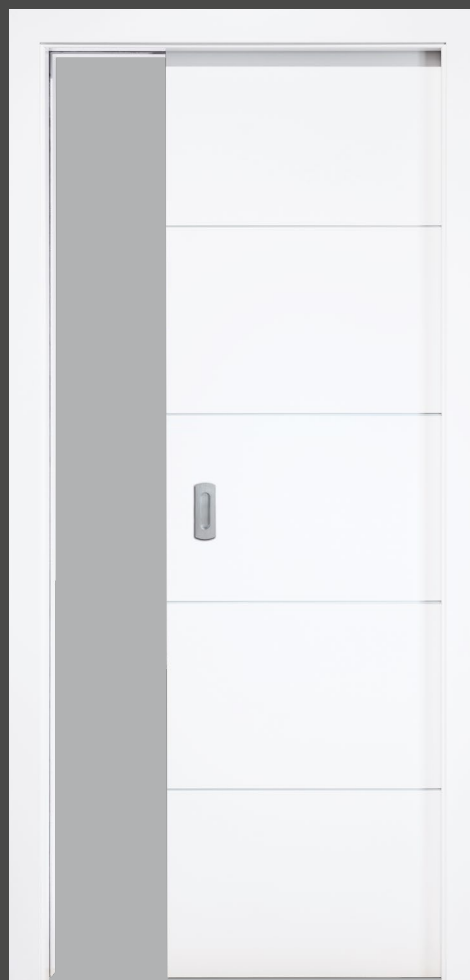

INSIDE

For endless free space.

A sliding door that **completely vanishes into the wall** when opened? DANA INSIDE makes it possible!

- Slides into the wall – door vanishes completely
- Simply pull the handle to slide out of the wall
- Maximum clearance width, more room to move
- With **DANAmotion System**
- Available in numerous designs
- Available as a solid door or all-glass door
- You will find more sliding door solutions from p. 86
- For the INSIDE solution to work properly, the track must be built into the wall, so early planning of door types is necessary

dana.at/inside

WAFFER THIN & UNIQUE

New: the flattest rosette on the market – only 0.8 mm

FLATFIX HANDLES

The ingenuity of simplicity.

"Less is more" – our FLATFIX handles underline this beautifully. We have taken the trend towards reduction to extremes: the wafer-thin, 0.8 mm rosette lies **virtually flush** with the door leaf – on both sides.

- Elegantly smooth appearance, **not only ideal for flush-fitting doors**
- The following versions are possible:
 - With **key or keyless**
 - Keyless **with a pin lock**: discreetly integrated in the rosette, making lost keys or tedious searching for keys a thing of the past
- Extremely **scratch-proof and durable**
- With round or rectangular-rounded stainless steel rosettes or with matt **black rectangular-rounded rosettes**
- A **design highlight for the same price as a standard version**

ELEGANTLY PURISTIC

in every detail: the most minimalist locking system on the market

HANDLES

and locking mechanisms from p. 113.

Locking button in push handle
ELEGANTLY INTEGRATED.

Push handle Nizza-300
with integrated lock button

FLATFIX | EASY HOLD

EASY HOLD

New, innovative technology for push handles.

Push handles are very much in vogue and are now available at DANA with an innovative locking function. The DANA EASY HOLD system for the Nizza push handle, for example, features an impressive locking function with DANA's new magnetic technology.

- The magnetic system **automatically holds the door shut**
- The **DANA EASY HOLD system** with Nizza push handle can be used with all DANA **solid swing door elements**
- Particularly convenient locking with a discreet locking button is available as an option: the lock and emergency release are **integrated directly in the Nizza push handle**
- **Almost invisible** mechanism
- These push handles are available with **stainless steel look** and **matt black** finishes,

dana.at/easy-hold

EUROBA matt white

MAGNETIC LOCK

Closes gently.

If desired for especially soft closing – with the simple elegance of FLATFIX handles. The latch remains retracted while the door is open and then extends automatically thanks to the integrated magnets when the door closes.

- Modern, smooth closing action
- Standard on flush-fitting doors
- More elegant appearance with grooved doors - optional
- More discreet strike plate
- **No wear on the strike plate in the frame** - wear-free
- Lock forend and strike plate available in stainless steel or matt black
- Not possible to extend latch by mistake
- Maintenance-free lock system: durable and easy to clean

dana.at/magnetfallenschloss

MAGNETIC LATCH LOCK |
TWIN HINGES

TWIN HINGES

Elegance down to the smallest detail.

To lend your door support and ensure it moves flawlessly in the frame it is hung on hinges. For some people this is a tiny detail – at DANA it's a stylish eye-catcher: thanks to our **high-quality twin hinges** in a stainless steel look!

- All hinges have the same look for a harmonious overall impression, for both standard and functional doors
- Great flexibility: even after installation the door is **easy to adjust**
- Perfectly matches all fittings
- A fine design highlight with a **high-quality surface**
- Also available in **matt black**

dana.at/twinband

MODUS 4 Matt white

SILENT+

for even more peace and comfort.

The DANA SILENT+ package is ideal for those parts of the home where noise levels are higher – from the kids' playroom to the room with the clanking washing machine.

- Significantly increased **noise protection**
- Brings calmness and harmony to the room
- With **sound-absorbing insert** and **drop-down seal**
- With a special seal in the frame
- **Improved dimensional stability** thanks to the reinforced door frame
- Almost every DANA door can **easily be modified** with the SILENT+ package
- Can also be combined with the PROTECT+ package (see p. 39)

dana.at/twinband

STAYS STRONG –
thanks to the reinforced
door frame.

EUROBA matt white

SILENT+ | PROTECT+

PROTECT+

For even greater stability.

The DANA PROTECT+ package is ideal for rooms in which humidity can temporarily increase, for instance the bathroom or utility room.

- Special solution for **temporary humidity increases**
- **Improved dimensional stability** thanks to the reinforced door frame
- **Coated bottom edge of the door leaf** – significantly better resistance to moisture absorption
- Almost every DANA door can **easily be modified** with the PROTECT+ package
- Can also be combined with the SILENT+ package (see p. 38)

PROTECT+ BRINGS DURABILITY -
ideal for the bathroom

dana.at/protectplus

CHARISMA-DQ
Cracked oak brown float glass

TOUGH 2-MM-THICK EDGE.

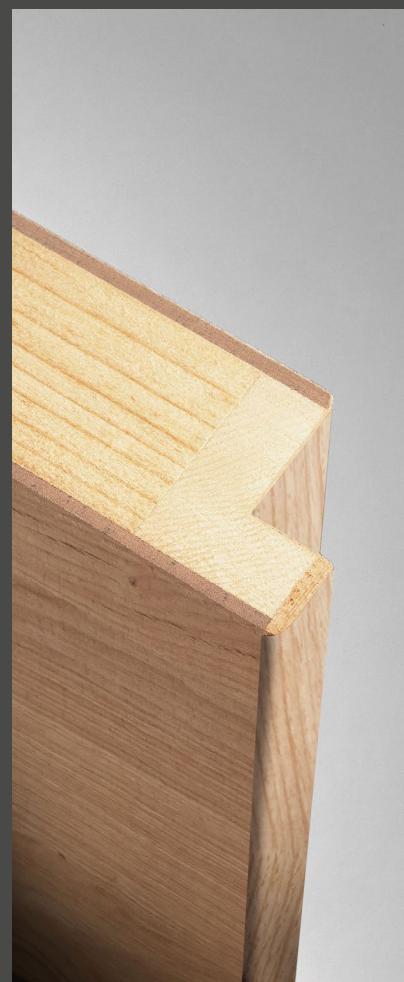

STRONG EDGE

Even tougher than before.

DANA doors are solidly built. Special attention is paid to high-quality door edge design. Where the door is subjected to the most stress, a thick edge of 2 mm solid wood is available in all standard types of wood for DANA veneer doors. The door then retains its beauty even during the toughest daily use.

- Even **more stable and resistant to wear** when objects collide with it (e.g. vacuum cleaners, children's toys, etc.)
- The thick edge absorbs **the impact forces** and makes the door more resilient
- **Tough 2-mm-thick edge** instead of the usual 0.6 mm
- **Standard on all doors in the Struktura series**
- Also available **for selected veneered doors** (not for opaque lacquered doors)

dana.at/starkkante

STRUKTURA larch
white coated

THICK EDGE | BRAND SIGN

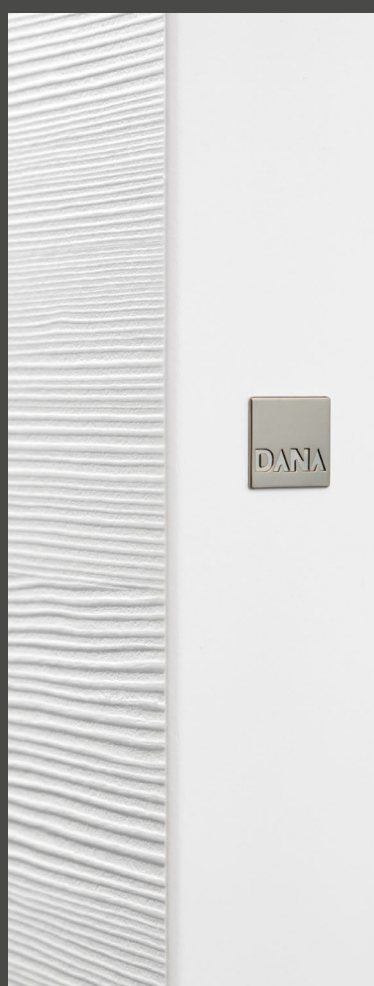

DANA BRAND SIGN

A sign of quality.

It is easy to see when a door is from DANA – from how it looks, how it feels, and the exceptional innovations it features. Our elegant brand sign on the door and casing now reveals even more quickly that you have chosen the premium quality of DANA.

- Makes premium quality plain to see straight away
- A seal of quality that is itself an eye-catcher

dana.at/brandsign

When you can feel the quality down to the last detail.

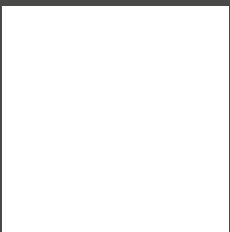

TWIN HINGES

A design highlight as standard – at no extra cost.

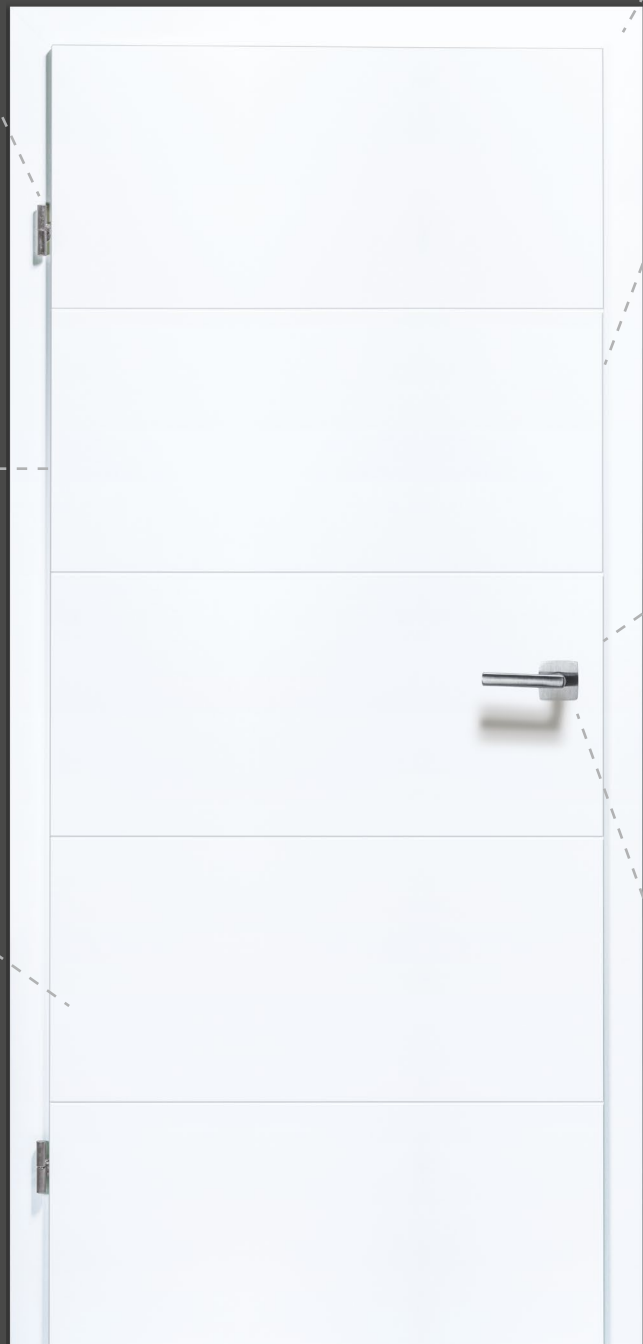

42-MM-THICK DOOR LEAF & FOUR-SIDED SOLID WOOD CASING

as standard. For more robustness, longer life and closing comfort.

HIGH-QUALITY RAL 9016 FINISH

as standard. Many other colours to choose from.

We've
made premium
quality standard.
At no extra
cost.

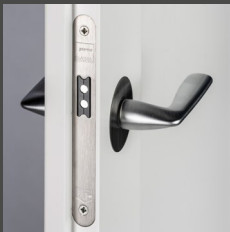

Premium quality as standard.

For us, premium quality is not an “upgrade” – it is part of the package and available as standard. It is this special DANA standard that gives your door its supreme quality and uniqueness – in every little detail.

DANA BRAND SIGN

Our elegant brand sign in the door rebate signals premium quality.

MAGNETIC LATCH LOCK

Available with especially smooth closing – with the simple elegance of FLATFIX handles.

FLATFIX HANDLES

A design highlight as standard. Wafer thin and virtually flush, with the flattest rosette on the market.

THE CASING AS A DESIGN ELEMENT.

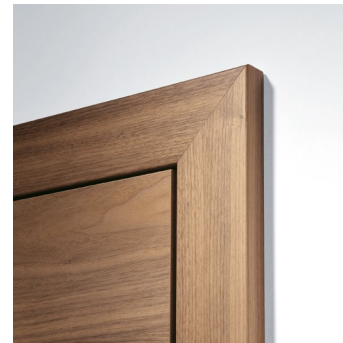

Classic elegance.

The door leaf, casing and wall clearly stand out with the grooved version.

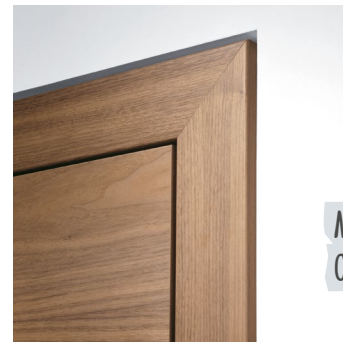

Stylish beauty.

On DANA MODUL the door leaf and casing form a single surface.

Puristic beauty.

On DANA PLANO the door leaf, casing and wall form a single surface.

MORE ABOUT THE
CASINGS FROM P. 126.

SLEEKNESS IN PERFECTION.

Private residential house.

A door doesn't have to stand out to bring pleasure. On the contrary. It is often the simple things in life that bring the greatest joy, especially for David B. He realised from the beginning of his search that a minimalist, clearly defined door design is the perfect match for his own home.

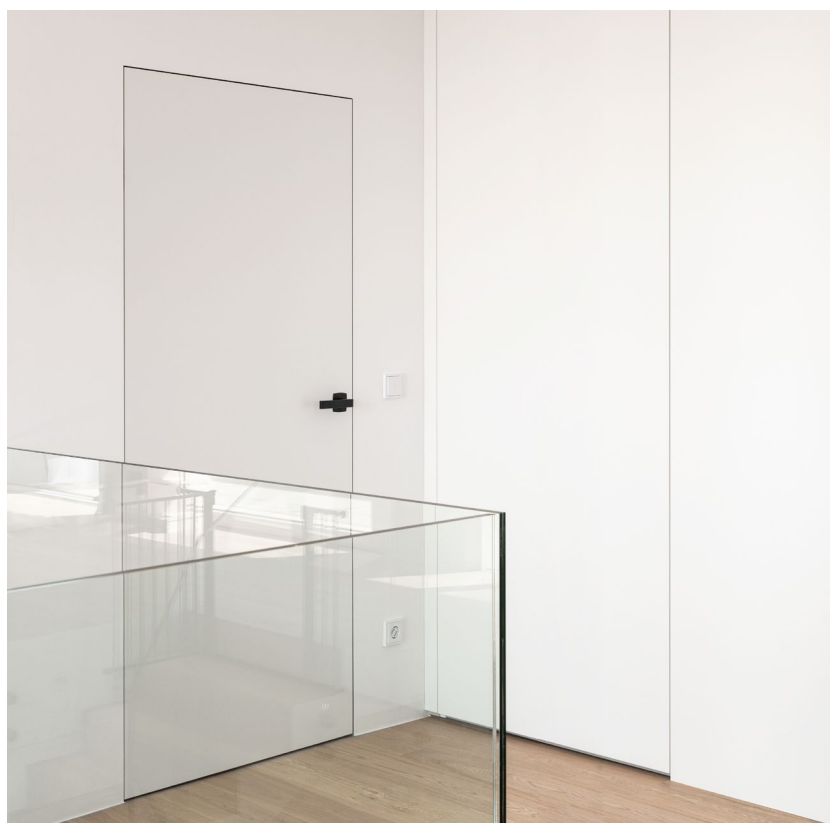

A classic door meets innovation.

During a visit to the DANA showroom in Linz, the home owner was immediately impressed by the KONTEXT 46 flush-mounted door model, which adapts to the wall as well as to any style. The innovative DANA smartClose Pro system also made a positive impression. The closing damper with locking function guarantees a higher level of convenience and proved to be the perfect choice for a straightforward style of living.

”

I am very pleased with the door, because it includes the integrated additional function smartClose. So it closes the last few centimetres by itself - this is extremely satisfying, exudes quality and is immediately noticeable.

David B. | Home owner

OPEN. TO.

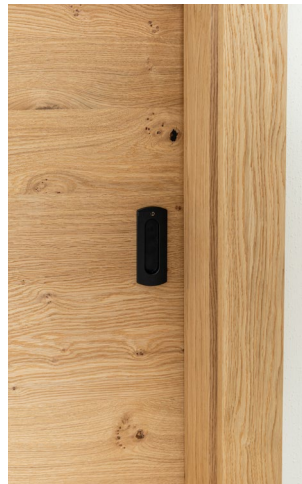

[DANA.AT/REFERENCES](https://dana.at/references)

”

I know a lot of people who have opted for DANA doors when they built their new house or renovated a building - and all of them are completely satisfied. I am also impressed by the innovations and functions, but also by the beautiful surfaces.

Andreas K.-W. | Home owner

OPEN. TO.

[DANA.AT/REFERENCES](https://dana.at/references)

MODERN STYLE WITH NATURAL HIGHLIGHTS.

Private residential house.

The door to Mr. K.-W.'s living room opens into modern surroundings. Beautifully natural floors and perfectly matching DANA doors in knotted oak bring warmth and a sophisticated yet rustic flair to the rooms.

Created from the full.

The proud owner didn't need to compromise on function or appearance. Innovations such as SILENT+ and PROTECT+ give you more peace and quiet in the rooms and offer optimum protection if humidity increases briefly. In terms of design, the matt black handles and door knobs add attractive highlights. DANAmotion also impressed Andreas K.-W. - with children in the house, the perfect function: no risk of doors flying open and no more loud door slamming.

**BEFORE,

for more design freedom.

SLIDING DOORS

Room for possibilities.

Sliding doors are the grand masters of flexibility: they split rooms without dividing them permanently. Sliding doors are also real space savers – and they are available from DANA in many variations, from all-glass to solid wood, and in a variety of systems.

**WIDE VARIETY OF
SLIDING DOORS**

More at
dana.at/schiebetueren

FRONTSIDE

Elegantly hidden.

- For single-leaf or double-leaf sliding doors
- Straight-edged covering strip
- For solid and all-glass doors
- Available with all lacquered and oiled surfaces (see from p. 96) from the DANA range
- With DANAmotion system
- Available with casing or without
- Solid doors optionally lockable with hinge section

FRONTSIDE sliding door system runs in front of the wall

FLEXSIDE

Strong no-compromise design.

- For single-leaf or double-leaf sliding doors
- Narrow design profile of 60 mm
- For solid and all-glass doors
- Available with glass side panel as an option
- Surfaces: stainless steel look and matt black
- With DANAmotion system
- Wall and ceiling mounting possible
- Solid doors optionally lockable with hinge section

OPTIONALLY WITH
CEILING MOUNTING.

FLEXSIDE sliding door system runs in front of the wall

INSIDE

For endless free space.

Would you like to have even more creative freedom? **DANA INSIDE**, the sliding door that completely vanishes into the wall, makes it possible. More details on **p. 33**.

INSIDE sliding door system slides inside the wall

**BEFORE,
BEHIND,

FRAMELESS DIVERSITY.

Flush with the wall.

It is framelessly simple and completely in fashion: our KONTEXT 46. The flush design transforms the door into a striking eye-catcher in any room with a wide range of design options. The special feature: KONTEXT 46 is equally impressive as an interior door and apartment entrance door (KONTEXT 66) and adapts wonderfully to your individual style.

VESTIBULE SOLUTIONS

Perfectly matched to you.

GLASS ELEMENTS ARE AVAILABLE WITH OR WITHOUT BOTTOM RAIL.

We all have different demands on our rooms - and of course on our doors. Our vestibule solutions offer you a variety of individual and customised options to prevent drafts and heat loss in your home and to visually enhance your rooms.

What makes our vestibule solutions so special?

- Popular solution for the separation of corridors and living rooms
- Stops cold air from entering
- Heat is retained much better in the rooms
- Glass elements transport more daylight into the interior of your home

Find all this and more in our vestibule folder!

SURFACES

Diverse and truly beautiful.

From elegant to rustic, finely textured or with cracks “as nature intended” – choose from a wide range of surfaces the one that perfectly suits your own individual style. Customise every little detail of your interiors just as you like and make even opening your doors an experience to savour – every time.

Choose from:

- Solid wood
- Wood veneer
- Brushed wood veneer – STRUKTURA
- Brushed wood veneer with natural cracks – STRUKTURA
- Brushed wood veneer, white oiled or varnished in white – STRUKTURA
- Wood veneer brushed and oiled brown or grey - STRUKTURA
- Partially textured varnished doors
- Varnished doors
- Glass (from p. 102)

AT ONE OF OUR DANA SHOWROOMS!

SYMMETRICAL OR PLANKED?

Naturally unique texture with any surface.

Standard version: THE PLANKED SURFACE

Also known as the floorboard or natural finish, the planked surface offers a particularly exciting look. For this purpose, different sheets of wood are randomly placed next to each other and glued together. This creates a similar pattern over several panels with a natural, decorative effect.

Birch, beech, oak, ash, ash heartwood, Canadian maple and nut, all with a

SYMMETRICAL OR PLANKED

surface.

Other options: THE SYMMETRICAL SURFACE

A great feel and look is guaranteed with the symmetrical surface, because all eyes turn to the "mirror effect". Each veneer of wood is turned over and glued like the leaves of a book. This creates a symmetrical image, which, depending on the wood, has an elegant or vivid pattern. With this surface, the more vivid the grain of the wood, the more prominent the mirror-like effect.

**ELEGANT
PERSPECTIVE**

thanks to
float glass.

All-glass door, white glass

DANA GLASS DESIGNS.

Every type of glass has its own advantages. Clear glass, for instance, has its typical greenish tinge, while in white glass the green is almost undetectable. Grey glass, on the other hand, has no hint of green at all. Its tint lends it a modern, refined look ideally suited to today's styles of living.

BASIC GLASS TYPES

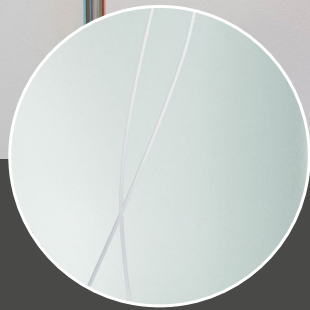

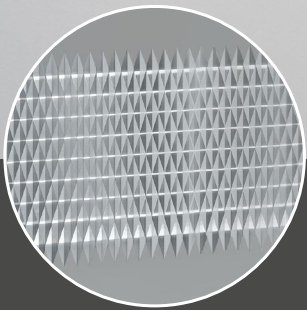

- FLOAT GLASS (clear glass)
- WHITE GLASS (clear glass)
- GREY GLASS (clear glass)
- SATIN FINISH GLASS
- SATIN FINISH WHITE GLASS

HOW THE GLASS GETS ITS PATTERN

- **PRINT DESIGN FROSTING**
The pattern is melted into the glass at 700 °C and is durable, easy to clean and sparkling.
- **GROOVE CUT**
The popular finishing technique for an interesting texture and relief look.
- **LASER TECHNIQUE**
The patterns are cut into the glass by laser – the surface stays smooth and very easy to clean.

MORE THAN A DETAIL.

The frame for your door.

Choosing the door is not the end of the story. Because the frame also makes a decisive impression on the appearance and effect of your DANA door. There are three variants to choose from: **the wood casing, the steel casing** or the **panel frame and door frame**. Which frame in which design is the right one depends on the situation and the style that you would like to reflect in your home.

It is best to start thinking about the design and the right frames for your DANA doors during the planning phase. Discover all your options here!

How should the door and casing look? Discover all the possibilities on p. 42 - and the wide range of different designs from

KONTEXT 46 on page 29!

THE WOOD CASING.

The classic door frame.

This version covers the **raw wall section**, so it does not need to be plastered. **The doors are installed when the floors have been laid and the walls are finished**. You have a wide range of designs to choose from: **Door, wall and frame can be flush or stepped**. The design of the frame ranges from **angular to rounded edges**. This way you can live your style down to the last detail.

GEOMETRY OF THE F97 CASING

with rounded edges
(visible width 75 mm)

GEOMETRY OF THE P14 CASING

with clean edges
(visible width 75 mm)

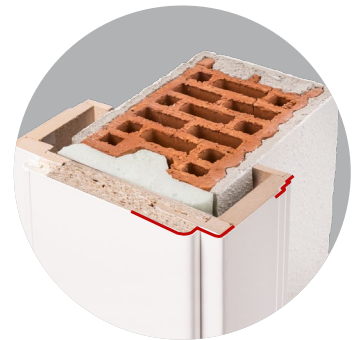

GEOMETRY OF THE STRUKTURA CASING (Z-STRUKTURA)

with sleek edges and brushed (visible width 75 mm)

GEOMETRY OF THE J10 CASING

with sleek edges and narrow visible width (55 mm)

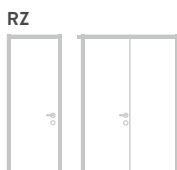

GEOMETRY OF THE Z-AUDIENZ

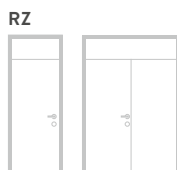

with rounded edges and two rebates on the casing (visible width 75 mm)

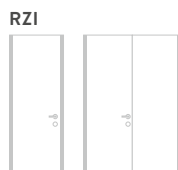

Casing single leaf, double leaf

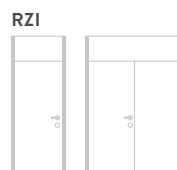

Ceiling-height frame with head but without transom up to a clear frame height of 2,520 mm (single leaf, double leaf)

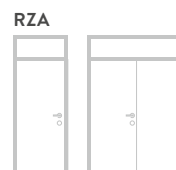

Ceiling-height frame with head but without transom, with top panel up to a clear frame height of 2,520 mm (single leaf, double leaf)

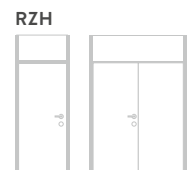

Ceiling-height frame without head and transom up to a clear ceiling height of 2,600 mm (single leaf, double leaf)

Ceiling-height frame without head and transom, with top panel up to a clear ceiling height of 2,600 mm (single leaf, double leaf)

Ceiling height frame with head, transom and fanlight up to a clear frame height of 2,520 mm (single leaf, double leaf)

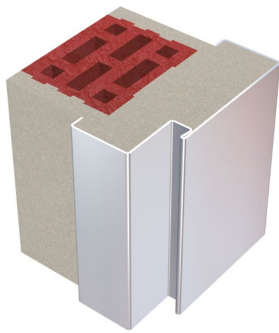

Ceiling-height frame without head, with transom and fanlight up to a ceiling height of 2,600 mm (single leaf, double leaf)

THE STEEL CASING.

The strong frame with a discreet look.

A wide range of design options for every situation and all wall types - the steel frame fits everywhere. It enables the implementation of a **very narrow visible width** for a wonderfully elegant, discreet look. Do you need to renovate existing steel frames? With our **renovation profiles** this is done in the twinkling of an eye. The advantage: **there is still plenty of clearance.**

STEEL CASING 42 PROFILE

STEEL CASING 64 PROFILE
Two-piece corner casing
Retrofit (renovation)

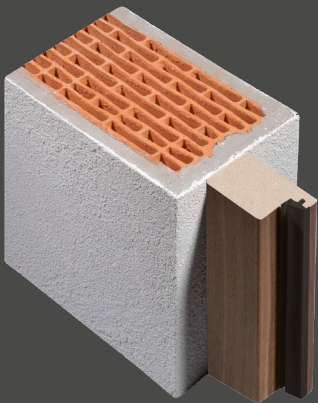

STEEL CASING 24 PROFILE
Corner casing
Retrofit (renovation)

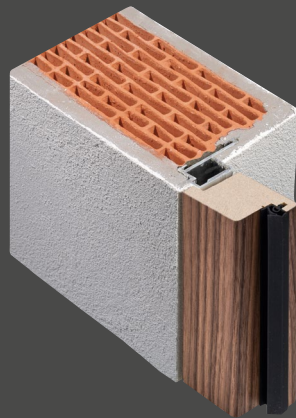

PANEL FRAME, DOOR FRAME & PLANO CASING

A real variety of door frames.

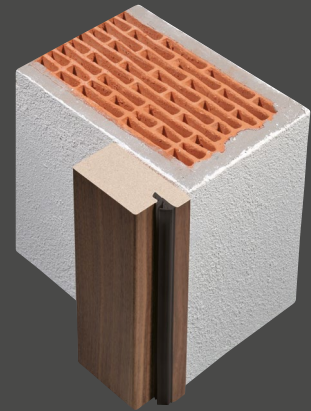

These versions are **installed on the finished plastered wall** - with subframe if required. This can be installed **during the construction phase**. This makes it easy to fit the frame later on. Choose **any position in the embrasure**. **Panel frames** can also be installed **on the wall in front of the embrasure** - to ensure maximum clearance as well as stunning looks.

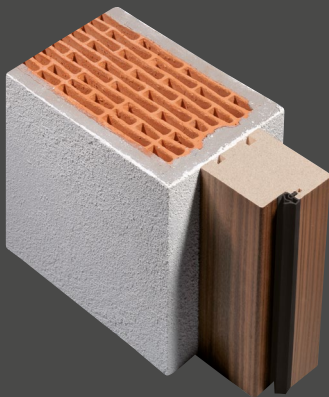

S-INTERIOR 46 DOOR FRAME
fitted in the embrasure (any position)

S-INTERIOR 46 DOOR FRAME
fitted in the embrasure with aluminium subframe

BM 45 PANEL FRAME
mounted on the wall in front of the embrasure

RST DOOR FRAME
fitted in the embrasure (any position)

RST FRAME
fitted in the embrasure with subframe

F97/PLANO CASING
with rounded edges in combination with
the Plano subframe

EXTERIOR DOORS.

Maximum security - no worries!

At DANA, we understand that many different requirements are made of entrances to a home and offer the perfect solutions for the design, function and security of every kind of entrance.

- **Hard-wearing and easy-to-clean** surface layers in a wide range of colours and designs
- Optional fire protection
- **Advanced security system** up to class 3 burglary resistant (RC3)
- **Excellent thermal insulation** ($U = 1.1 \text{ W/m}^2\text{K}$)
- Noise insulation up to 43 dB or optionally 45 dB
- Extremely hard-wearing and moisture-resistant cast resin edge – with two-colour option
- Available with innovative fingerprint system as an option
- Glass bead for glass inlays, side lights and fanlights in elegant stainless steel look – virtually flush-fitting

Also available
as a **DANA
SMART DOOR**
More details on p. 132

2b

ENTRANCE DOORS FOR APARTMENTS WITH SECURITY SYSTEM.

More security at home.

DANA pays a great deal of attention to apartment entrance doors, where it is also important to skilfully combine safety and security.

- **Advanced security system** up to class 3 burglary resistant (RC3)
- Various **models to choose from** – find the right door for your needs
- Available with glass cutouts, side lights and fanlight as options. Safety glass used according to the class of burglary resistance chosen
- Available grooved or as Modul or KONTEXT 66
- Complies with **climate class C**
- Available with innovative fingerprint system as an option for maximum security

Also available
as a DANA
SMART DOOR

Opens automatically
when you approach with

AUTO UNLOCK

DANA SMART DOOR.

Smart tech fully integrated.

- Open your DANA SMART DOOR with your smartphone using Nuki and a Bluetooth or internet connection
 - The front door opens using the Nuki app or a smartwatch and automatically for authorised people when they approach
 - Door opens with a voice command via the integrated virtual assistant
 - It can also be opened with a fingerprint or numerical code using the optional integrated Nuki Keypad 2 Pro
- Managing digital and temporary access rights
 - Easy modification and deactivation of access rights
 - Every instance of locking and unlocking is recorded in the Nuki app
 - Current door status is shown in the button's LED display and in the app
- The entrance door can still be opened using the front door key
- Easy integration in current smart home systems
- Maximum security thanks to burglary-resistant multiple locking and monitored access control
- The system is fully integrated at DANA and tested in the door.

DOOR CARE MADE EASY.

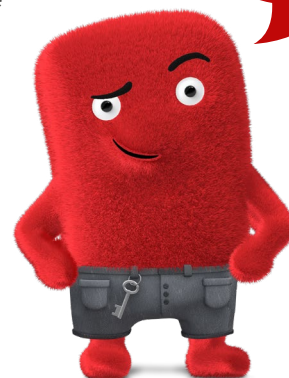

The DANA oil care and basic set.

We want you to get the best out of your DANA doors for a long time and enjoy the look of them every day. Regular care is crucial here - and that's what we offer the right set for!

Because we know precisely what each door needs, we have put together a basic set for your interior doors and an oil care set for oiled surfaces (e.g. Struktura).

Savour the elegance of your DANA doors - for years to come!
